LETTER TO INVESTORS

February 12, 2010

The following is an update of AllianceBernstein Variable Products Series Fund AllianceBernstein Large Cap Growth Portfolio (the "Portfolio") for the annual reporting period ended December 31, 2009.

INVESTMENT OBJECTIVE AND POLICIES

The Portfolio's investment objective is long-term growth of capital. The Portfolio invests primarily in the equity securities of a limited number of large, carefully selected, high-quality US companies. The Adviser tends to focus on those companies that have strong management, superior industry positions, excellent balance sheets and superior earnings growth prospects. Under normal circumstances, the Portfolio will invest at least 80% of its net assets in common stocks of large-capitalization companies. For these purposes, "large-capitalization companies" are those that, at the time of investment, have market capitalizations within the range of market capitalizations of companies appearing in the Russell 1000 Growth Index. The Adviser looks for companies whose substantially above-average earnings growth is not fully reflected in current market valuations. The Adviser expects that normally the Portfolio's investments will tend to emphasize investments in securities issued by US companies, although it may invest in foreign securities. The Portfolio is designed for those seeking to accumulate capital over time with less volatility than that associated with investment in smaller companies. Normally, the Portfolio invests in about 50-70 companies, with the 25 most highly regarded of these companies usually constituting approximately 70% of the Portfolio's net assets. The Portfolio is thus atypical from most equity mutual funds in its focus on a relatively small number of intensively researched companies.

INVESTMENT RESULTS

The table on page 3 shows the Portfolio's performance compared to its benchmark, the Russell 1000 Growth Index, in addition to the broad market as measured by the Standard & Poor's (S&P) 500 Stock Index, for the one-, five- and 10-year periods ended December 31, 2009.

The Portfolio's Class A shares outperformed its benchmark for the annual reporting period ended December 31, 2009. Outperformance for the period was due to stock selection, primarily in the materials, energy and technology sectors. These sectors accounted for seven out of ten of the Portfolio's top ten individual contributors. Stock selection in the financials sector also added to relative outperformance for the period. Detractors for the 12-month period came from stock selection in the consumer discretionary and consumer staples sectors, as well as the Portfolio's overweight in the health care sector.

MARKET REVIEW AND INVESTMENT STRATEGY

Several transitions took place in 2009. In terms of investment style, the first and fourth quarters favored growth, while value stocks rallied in the middle two periods. This pattern was very much in sync with wholesale shifts in investor attitudes toward risk across styles: first they shunned risk altogether, then signs of economic recovery prompted them to embrace stocks previously branded as risky and whose prices had plunged most precipitously. By the fourth quarter, however, a more discriminating attitude toward risk was becoming evident.

Financials were one example; the sector got particularly hard hit during the reporting period amid fears of potentially restrictive regulation, concerns around financial stability at some companies and increased regulatory restrictions overshadowed generally improving fundamental performance. After outperforming through September 30, 2009, financials were the S&P 500 Stock Index's only underperforming sector for the fourth quarter. The financials sector remains the Portfolio's largest overweight.

LARGE CAP GROWTH PORTFOLIO

HISTORICAL PERFORMANCE

AllianceBernstein Variable Products Series Fund

An Important Note About the Value of Historical Performance

The performance shown on the following page represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. Please contact your Financial Advisor or Insurance Agent Representative at your financial institution to obtain portfolio performance information current to the most recent month-end.

Investors should consider the investment objectives, risks, charges and expenses of the Fund/Portfolio carefully before investing. For copies of our prospectus or summary prospectus, which contain this and other information, visit us online at www.alliancebernstein.com or contact your AllianceBernstein Investments representative. Please read the prospectus and/or summary prospectus carefully before investing.

All fees and expenses related to the operation of the Portfolio have been deducted, but no adjustment has been made for insurance company separate account or annuity contract charges, which would reduce total return to a contract owner. NAV returns do not reflect sales charges; if sales charges were reflected, the Portfolio's quoted performance would be lower. Performance assumes reinvestment of distributions and does not account for taxes.

Benchmark Disclosure

Neither the unmanaged Russell 1000 Growth Index nor the unmanaged Standard & Poor's (S&P) 500 Stock Index reflects fees and expenses associated with the active management of a mutual fund portfolio. The Russell 1000 Growth Index contains those securities in the Russell 1000 Index with a greater-than-average growth orientation. The unmanaged Russell 1000 Index is comprised of 1000 of the largest capitalized companies that are traded in the United States. The S&P 500 Stock Index is comprised of 500 US companies and is a common measure of the performance of the overall US stock market. An investor cannot invest directly in an index, and its results are not indicative of the performance for any specific investment, including the Portfolio.

A Word About Risk

The Portfolio concentrates its investments in a limited number of issues and an investment in the Portfolio is therefore subject to greater risk and volatility than investments in a more diversified portfolio. Growth investing does not guarantee a profit or eliminate risk. The stocks of these companies can have relatively high valuations. Because of these high valuations, an investment in a growth stock can be more risky than an investment in a company with more modest growth expectations. While the Portfolio invests principally in common stocks and other equity securities, in order to achieve its investment objectives, the Portfolio may at times use certain types of investment derivatives, such as options, futures, forwards and swaps. These instruments involve risks different from, and in certain cases, greater than, the risks presented by more traditional investments. These risks are fully discussed in the Variable Products prospectus. **There are additional fees and expenses associated with all Variable Products. These fees can include mortality and expense risk charges, administrative charges, and other charges that can significantly reduce investment returns. Those fees and expenses are not reflected in this annual report. You should consult your Variable Products prospectus for a description of those fees and expenses and speak to your insurance agent or financial representative if you have questions. You should read the prospectus before investing or sending money.**

AllianceBernstein Variable Products Series Fund

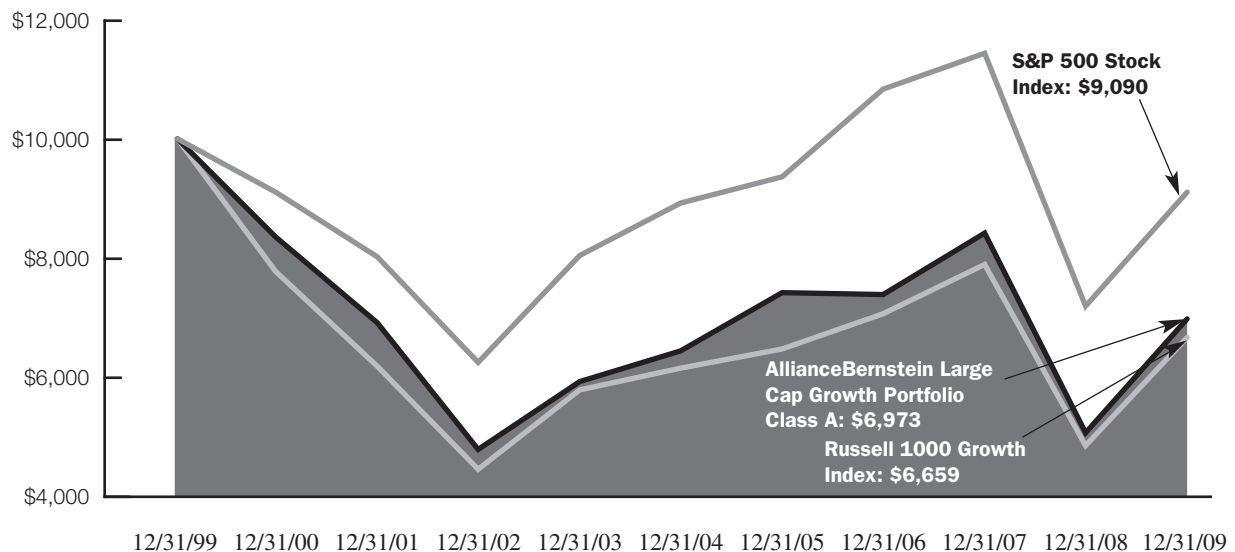

THE PORTFOLIO VS. ITS BENCHMARK PERIODS ENDED DECEMBER 31, 2009	Returns		
	1 Year	5 Years	10 Years
AllianceBernstein Large Cap Growth Portfolio Class A*	37.52%	1.62%	-3.54%
AllianceBernstein Large Cap Growth Portfolio Class B*	37.10%	1.36%	-3.79%
Russell 1000 Growth Index	37.21%	1.63%	-3.99%
S&P 500 Stock Index	26.46%	0.42%	-0.95%

* Includes the impact of proceeds received and credited to the Portfolio resulting from class action settlements, which enhanced the Portfolio's performance for the year ended December 31, 2009 by 1.96%.

The Portfolio's current prospectus fee table shows the Portfolio's total annual operating expense ratios as 0.84% and 1.09% for Class A and Class B, respectively. The Financial Highlights section of this report sets forth expense ratio data for the current reporting period; the expense ratios shown above may differ from the expense ratios in the Financial Highlights section since they are based on different time periods.

ALLIANCEBERNSTEIN LARGE CAP GROWTH PORTFOLIO CLASS A GROWTH OF A \$10,000 INVESTMENT 12/31/99 – 12/31/09

- AllianceBernstein Large Cap Growth Portfolio Class A
- Russell 1000 Growth Index
- S&P 500 Stock Index

This chart illustrates the total value of an assumed \$10,000 investment in AllianceBernstein Large Cap Growth Portfolio Class A shares (from 12/31/99 to 12/31/09) as compared to the performance of the Portfolio's benchmark, the Russell 1000 Growth Index, and the broad market, as represented by the S&P 500 Stock Index. The chart assumes the reinvestment of dividends and capital gains distributions.

See Historical Performance and Benchmark disclosures on previous page.

LARGE CAP GROWTH PORTFOLIO
FUND EXPENSES (unaudited)

AllianceBernstein Variable Products Series Fund

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments, contingent deferred sales charges on redemptions and (2) ongoing costs, including management fees; distribution (12b-1) fees; and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period as indicated below.

Actual Expenses

The first line of each class' table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period. The estimate of expenses does not include fees or other expenses of any variable insurance product. If such expenses were included, the estimate of expenses you paid during the period would be higher and your ending account value would be lower.

Hypothetical Example for Comparison Purposes

The second line of each class' table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed annual rate of return of 5% before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds by comparing this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds. The estimate of expenses does not include fees or other expenses of any variable insurance product. If such expenses were included, the estimate of expenses you paid during the period would be higher and your ending account value would be lower.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), or contingent deferred sales charges on redemptions. Therefore, the second line of each class' table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

<u>Large Cap Growth Portfolio</u>	<u>Beginning Account Value July 1, 2009</u>	<u>Ending Account Value December 31, 2009</u>	<u>Expenses Paid During Period*</u>	<u>Annualized Expense Ratio*</u>
Class A				
Actual	\$ 1,000	\$ 1,257.32	\$ 4.95	0.87%
Hypothetical (5% return before expenses)	\$ 1,000	\$ 1,020.82	\$ 4.43	0.87%
Class B				
Actual	\$ 1,000	\$ 1,255.45	\$ 6.37	1.12%
Hypothetical (5% return before expenses)	\$ 1,000	\$ 1,019.56	\$ 5.70	1.12%

* Expenses are equal to each classes' annualized expense ratios, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period).

Please note: The sector classifications presented herein are based on the Global Industry Classification Standard (GICS) which was developed by Morgan Stanley Capital International and Standard & Poor's. The fund components are divided into sector, industry group, and industry sub-indices as classified by the GICS for each of the market capitalization indices in the Broad Market. These sector classifications are broadly defined. The "Portfolio of Investments" section of the report reflects more specific industry information and is consistent with the investment restrictions discussed in the fund's prospectus.

LARGE CAP GROWTH PORTFOLIO

NOTES TO FINANCIAL STATEMENTS

December 31, 2009

AllianceBernstein Variable Products Series Fund

NOTE A: Significant Accounting Policies

The AllianceBernstein Large Cap Growth Portfolio (the “Portfolio”) is a series of AllianceBernstein Variable Products Series Fund, Inc. (the “Fund”). The Portfolio’s investment objective is long-term growth of capital. Prior to February 1, 2006, the Portfolio’s investment objective was to seek growth of capital by pursuing aggressive investment policies. The Portfolio is diversified as defined under the Investment Company Act of 1940. The Fund was incorporated in the State of Maryland on November 17, 1987, as an open-end series investment company. The Fund offers thirteen separately managed pools of assets which have differing investment objectives and policies. The Portfolio offers Class A and Class B shares. Both classes of shares have identical voting, dividend, liquidating and other rights, except that Class B shares bear a distribution expense and have exclusive voting rights with respect to the Class B distribution plan.

The Portfolio offers and sells its shares only to separate accounts of certain life insurance companies for the purpose of funding variable annuity contracts and variable life insurance policies. Sales are made without a sales charge at the Portfolio’s net asset value per share.

The financial statements have been prepared in conformity with U.S. generally accepted accounting principles (“U.S. GAAP”) which require management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Portfolio.

1. Security Valuation

Portfolio securities are valued at their current market value determined on the basis of market quotations or, if market quotations are not readily available or are deemed unreliable, at “fair value” as determined in accordance with procedures established by and under the general supervision of the Fund’s Board of Directors.

In general, the market value of securities which are readily available and deemed reliable are determined as follows. Securities listed on a national securities exchange (other than securities listed on the NASDAQ Stock Market, Inc. (“NASDAQ”)) or on a foreign securities exchange are valued at the last sale price at the close of the exchange or foreign securities exchange. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices on such day. Securities listed on more than one exchange are valued by reference to the principal exchange on which the securities are traded; securities listed only on NASDAQ are valued in accordance with the NASDAQ Official Closing Price; listed put or call options are valued at the last sale price. If there has been no sale on that day, such securities will be valued at the closing bid prices on that day; open futures contracts and options thereon are valued using the closing settlement price or, in the absence of such a price, the most recent quoted bid price. If there are no quotations available for the day of valuation, the last available closing settlement price is used; securities traded in the over-the-counter market (“OTC”) are valued at the mean of the current bid and asked prices as reported by the National Quotation Bureau or other comparable sources; U.S. government securities and other debt instruments having 60 days or less remaining until maturity are valued at amortized cost if their original maturity was 60 days or less; or by amortizing their fair value as of the 61st day prior to maturity if their original term to maturity exceeded 60 days; fixed-income securities, including mortgage backed and asset backed securities, may be valued on the basis of prices provided by a pricing service or at a price obtained from one or more of the major broker/dealers. In cases where broker/dealer quotes are obtained, AllianceBernstein L.P. (the “Adviser”) may establish procedures whereby changes in market yields or spreads are used to adjust, on a daily basis, a recently obtained quoted price on a security; and OTC and other derivatives are valued on the basis of a quoted bid price or spread from a major broker/dealer in such security.

Securities for which market quotations are not readily available (including restricted securities) or are deemed unreliable are valued at fair value. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, analysis of the issuer’s financial statements or other available documents. In addition, the Portfolio may use fair value pricing for securities primarily traded in non-U.S. markets because most foreign markets close well before the Portfolio values its securities at 4:00 p.m., Eastern Time. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, may have occurred in the interim and may materially affect the value of those securities. To account for this, the Portfolio may frequently value many of its foreign equity securities using fair value prices based on third party vendor modeling tools to the extent available.

2. Fair Value Measurements

In accordance with U.S. GAAP regarding fair value measurements, fair value is defined as the price that the Portfolio would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement

LARGE CAP GROWTH PORTFOLIO

NOTES TO FINANCIAL STATEMENTS

(continued)

AllianceBernstein Variable Products Series Fund

date. The disclosure requirements also establish a framework for measuring fair value, and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Portfolio. Unobservable inputs reflect the Portfolio's own assumptions about the assumptions that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. Each investment is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-tier hierarchy of inputs is summarized below.

- Level 1—quoted prices in active markets for identical investments
- Level 2—other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3—significant unobservable inputs (including the Portfolio's own assumptions in determining the fair value of investments)

The following table summarizes the valuation of the Portfolio's investments by the above fair value hierarchy levels as of December 31, 2009:

Investments in Securities	Level 1	Level 2	Level 3	Total
Assets:				
Common Stocks				
Technology	\$139,423,286	\$ 0-	\$ 0-	\$139,423,286
Financial Services	76,655,299	0-	0-	76,655,299
Health Care	65,857,932	0-	0-	65,857,932
Consumer Discretionary	45,209,540	0-	0-	45,209,540
Energy	39,123,221	2,821,700	0-	41,944,921
Producer Durables	37,937,725	0-	0-	37,937,725
Materials & Processing	26,271,679	0-	0-	26,271,679
Consumer Staples	9,353,403			9,353,403
Short-Term Investments	0-	2,216,000	0-	2,216,000
Total Investments in Securities	439,832,085	5,037,700	0-	444,869,785
Other Financial Instruments*:				
Assets	0-	0-	0-	0-
Liabilities	(34,320)	0-	0-	(34,320)
Total	<u>\$439,797,765</u>	<u>\$5,037,700</u>	<u>\$ 0-</u>	<u>\$444,835,465</u>

* Other financial instruments are derivative instruments, such as futures, forwards and swap contracts, which are valued at the unrealized appreciation/depreciation on the instrument.

3. Currency Translation

Assets and liabilities denominated in foreign currencies and commitments under forward currency exchange contracts are translated into U.S. dollars at the mean of the quoted bid and asked prices of such currencies against the U.S. dollar. Purchases and sales of portfolio securities are translated into U.S. dollars at the rates of exchange prevailing when such securities were acquired or sold. Income and expenses are translated into U.S. dollars at rates of exchange prevailing when accrued.

Net realized gain or loss on foreign currency transactions represents foreign exchange gains and losses from sales and maturities of foreign fixed income investments, foreign currency exchange contracts, holding of foreign currencies, currency gains or losses realized between the trade and settlement dates on foreign investment transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Portfolio's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized currency gains and losses from valuing foreign currency denominated assets and liabilities at period end exchange rates are reflected as a component of net unrealized appreciation or depreciation of investments and foreign currency denominated assets and liabilities.

4. Taxes

It is the Portfolio's policy to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its investment company taxable income and net realized gains, if any, to shareholders. Therefore, no provisions for federal income or excise taxes are required. The Portfolio may be subject to taxes imposed by countries in which it invests. Such taxes are generally based on income and/or capital gains earned or repatriated. Taxes are accrued and applied to net investment income, net realized gains and net unrealized appreciation/depreciation as such income and/or gains are earned.

In accordance with U.S. GAAP requirements regarding accounting for uncertainties in income taxes, management has analyzed the Portfolio's tax positions taken on federal and state income tax returns for all open tax years (the current and the prior three tax years) and has concluded that no provision for income tax is required in the Portfolio's financial statements.

5. Investment Income and Investment Transactions

Dividend income is recorded on the ex-dividend date or as soon as the Portfolio is informed of the dividend. Interest income is accrued daily. Investment transactions are accounted for on the date the securities are purchased or sold. Investment gains or losses are determined on the identified cost basis. The Portfolio amortizes premiums and accretes discounts as adjustments to interest income.

6. Class Allocations

All income earned and expenses incurred by the Portfolio are borne on a pro-rata basis by each outstanding class of shares, based on the proportionate interest in the Portfolio represented by the net assets of such class, except for class specific expenses which are allocated to the respective class. Expenses of the Fund are charged to each Portfolio in proportion to net assets. Realized and unrealized gains and losses are allocated among the various share classes based on respective net assets.

7. Dividends and Distributions

Dividends and distributions to shareholders, if any, are recorded on the ex-dividend date. Income dividends and capital gains distributions are determined in accordance with federal tax regulations and may differ from those determined in accordance with U.S. GAAP. To the extent these differences are permanent, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require such reclassification.

NOTE B: Advisory Fee and Other Transactions with Affiliates

Under the terms of the investment advisory agreement, the Portfolio pays the Adviser an advisory fee at an annual rate of .75% of the first \$2.5 billion, .65% of the next \$2.5 billion and .60% in excess of \$5 billion, of the Portfolio's average daily net assets. The fee is accrued daily and paid monthly.

Pursuant to the investment advisory agreement, the Portfolio may reimburse the Adviser for certain legal and accounting services provided to the Portfolio by the Adviser. For the year ended December 31, 2009, such fee amounted to \$79,258.

Brokerage commissions paid on investment transactions for the year ended December 31, 2009 amounted to \$500,928, of which \$0 and \$0, respectively, was paid to Sanford C. Bernstein & Co. LLC and Sanford C. Bernstein Limited, affiliates of the Adviser.

The Portfolio compensates AllianceBernstein Investor Services, Inc. ("ABIS"), a wholly-owned subsidiary of the Adviser, under a Transfer Agency Agreement for providing personnel and facilities to perform transfer agency services for the Portfolio. Such compensation retained by ABIS amounted to \$1,250 for the year ended December 31, 2009.

NOTE C: Distribution Plan

The Portfolio has adopted a Distribution Plan (the "Plan") for Class B shares pursuant to Rule 12b-1 under the Investment Company Act of 1940. Under the Plan, the Portfolio pays distribution and servicing fees to AllianceBernstein Investments, Inc. (the "Distributor"), a wholly-owned subsidiary of the Adviser, at an annual rate of up to .50% of the Portfolio's average daily net assets attributable to Class B shares. The fees are accrued daily and paid monthly. The Board of Directors currently limits payments under the Plan to .25% of the Portfolio's average daily net assets attributable to Class B shares. The Plan provides that the Distributor will use such payments in their entirety for distribution assistance and promotional activities.

The Portfolio is not obligated under the Plan to pay any distribution and servicing fees in excess of the amounts set forth above. The purpose of the payments to the Distributor under the Plan is to compensate the Distributor for its distribution services with respect to the sale of the Portfolio's Class B shares. Since the Distributor's compensation is not directly tied to

LARGE CAP GROWTH PORTFOLIO

NOTES TO FINANCIAL STATEMENTS

(continued)

AllianceBernstein Variable Products Series Fund

its expenses, the amount of compensation received by it under the Plan during any year may be more or less than its actual expenses. For this reason, the Plan is characterized by the staff of the Securities and Exchange Commission as being of the “compensation” variety.

In the event that the Plan is terminated or not continued, no distribution and servicing fees (other than current amounts accrued but not yet paid) would be owed by the Portfolio to the Distributor.

The Plan also provides that the Adviser may use its own resources to finance the distribution of the Portfolio’s shares.

NOTE D: Investment Transactions

Purchases and sales of investment securities (excluding short-term investments) for the year ended December 31, 2009 were as follows:

	<u>Purchases</u>	<u>Sales</u>
Investment securities (excluding U.S. government securities)	\$374,829,523	\$413,429,433
U.S. government securities	-0-	-0-

The cost of investments for federal income tax purposes, gross unrealized appreciation and unrealized depreciation are as follows:

Cost	<u>\$360,481,712</u>
Gross unrealized appreciation	\$ 86,367,083
Gross unrealized depreciation	<u>(1,979,010)</u>
Net unrealized appreciation	<u>\$ 84,388,073</u>

1. Derivative Financial Instruments

The Portfolio may use derivatives to earn income and enhance returns, to hedge or adjust the risk profile of its portfolio, to replace more traditional direct investments, or to obtain exposure to otherwise inaccessible markets. The Portfolio may also use derivatives for non-hedging purposes as a means of making direct investment in foreign currencies, as described below under “Currency Transactions”.

The principal types of derivatives utilized by the Portfolio, as well as the methods in which they may be used are:

- **Forward Currency Exchange Contracts**

The Portfolio may enter into forward currency exchange contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to hedge certain firm purchase and sale commitments denominated in foreign currencies and for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under “Currency Transactions.”

A forward currency exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contract and the closing of such contract would be included in net realized gain or loss on foreign currency transactions. Fluctuations in the value of open forward currency exchange contracts are recorded for financial reporting purposes as unrealized appreciation and/or depreciation by the Portfolio. Risks may arise from the potential inability of a counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. The face or contract amount, in U.S. dollars reflects the total exposure the Portfolio has in that particular currency contract.

- **Option Transactions**

For hedging and investment purposes, the Portfolio may purchase and write (sell) put and call options on U.S. and foreign securities and foreign currencies that are traded on U.S. and foreign securities exchanges and over-the-counter markets. The Portfolio may also use options transactions for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under “Currency Transactions”.

The risk associated with purchasing an option is that the Portfolio pays a premium whether or not the option is exercised. Additionally, the Portfolio bears the risk of loss of the premium and change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as

AllianceBernstein Variable Products Series Fund

portfolio securities. The cost of securities acquired through the exercise of call options is increased by premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

When the Portfolio writes an option, the premium received by the Portfolio is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are recorded by the Portfolio on the expiration date as realized gains from options written. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium received is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium received is added to the proceeds from the sale of the underlying security or currency in determining whether the Portfolio has realized a gain or loss. If a put option is exercised, the premium received reduces the cost basis of the security or currency purchased by the Portfolio. In writing an option, the Portfolio bears the market risk of an unfavorable change in the price of the security or currency underlying the written option. Exercise of an option written by the Portfolio could result in the Portfolio selling or buying a security or currency at a price different from the current market value. For the year ended December 31, 2009, the Portfolio had the following transactions in written options:

	Number of Contracts	Premium
Options written outstanding as of 12/31/08	—	\$ —
Options written	742	193,858
Options closed	(610)	(179,230)
Options written outstanding as of 12/31/09	132	\$ 14,628

At December 31, 2009, the Portfolio had entered into the following derivatives:

	Asset Derivatives		Liability Derivatives	
	Statement of Assets and Liabilities Location	Fair Value	Statement of Assets and Liabilities Location	Fair Value
<u>Derivatives Not Accounted for as Hedging Instruments</u>				
Equity contracts		\$ —	Options written, at value	\$34,320
Total				\$34,320

The effect of derivative instruments on the Statement of Operations for the year ended December 31, 2009:

	Location of Gain or (Loss) on Derivatives	Realized Gain or (Loss) on Derivatives	Change in Unrealized Appreciation or (Depreciation)
<u>Derivatives Not Accounted for as Hedging Instruments</u>			
Equity contracts	Net realized gain (loss) on options written; Net change in unrealized appreciation/depreciation of options written	\$78,684	\$(19,692)
Total		\$78,684	\$(19,692)

2. Currency Transactions

The Portfolio may invest in non-U.S. Dollar securities on a currency hedged or unhedged basis. The Portfolio may seek investment opportunities by taking long or short positions in currencies through the use of currency-related derivatives, including forward currency exchange contracts, futures and options on futures, swaps, and options. The Portfolio may enter into transactions for investment opportunities when it anticipates that a foreign currency will appreciate or depreciate in value but securities denominated in that currency are not held by the Portfolio and do not present attractive investment opportunities. Such transactions may also be used when the Adviser believes that it may be more efficient than a direct investment in a foreign currency-denominated security. The Portfolio may also conduct currency exchange contracts on a spot basis (i.e., for cash at the spot rate prevailing in the currency exchange market for buying or selling currencies).

Net decrease	<u>(1,463,612)</u>	<u>(3,101,366)</u>	<u>\$(29,485,418)</u>	<u>\$(80,339,630)</u>
Class B				
Shares sold	927,341	829,132	\$ 19,201,368	\$ 19,371,034
Shares redeemed	(2,187,819)	(3,262,224)	(43,596,374)	(79,329,893)
Net decrease	<u>(1,260,478)</u>	<u>(2,433,092)</u>	<u>\$(24,395,006)</u>	<u>\$(59,958,859)</u>

NOTE F: Risks Involved in Investing in the Portfolio

Foreign Securities Risk—Investing in securities of foreign companies or foreign governments involves special risks which include changes in foreign currency exchange rates and the possibility of future political and economic developments which could adversely affect the value of such securities. Moreover, securities of many foreign companies or foreign governments and their markets may be less liquid and their prices more volatile than those of comparable U.S. companies or of the U.S. government.

Currency Risk—This is the risk that changes in foreign currency exchange rates may negatively affect the value of the Portfolio's investments or reduce the returns of the Portfolio. For example, the value of the Portfolio's investments in foreign currency-denominated securities or currencies may decrease if the U.S. Dollar is strong (*i.e.*, gaining value relative to other currencies) and other currencies are weak (*i.e.*, losing value relative to the U.S. Dollar). Currency markets are generally not as regulated as securities markets. Independent of the Portfolio's investments denominated in foreign currencies, the Portfolio's positions in various foreign currencies may cause the Portfolio to experience investment losses due to the changes in exchange rates and interest rates.

Derivatives Risk—The Portfolio may invest in derivatives such as forwards, options, futures and swaps. These investments may be illiquid, difficult to price, and leveraged so that small changes may produce disproportionate losses for the Portfolio, and subject to counterparty risk to a greater degree than more traditional investments.

Indemnification Risk—In the ordinary course of business, the Portfolio enters into contracts that contain a variety of indemnifications. The Portfolio's maximum exposure under these arrangements is unknown. However, the Portfolio has not had prior claims or losses pursuant to these indemnification provisions and expects the risk of loss thereunder to be remote. As such, the Portfolio has not accrued any liability in connection with these indemnification provisions.

NOTE G: Joint Credit Facility

A number of open-end mutual funds managed by the Adviser, including the Portfolio, participate in a \$140 million revolving credit facility (the "Facility") intended to provide short-term financing, if necessary, subject to certain restrictions in connection with abnormal redemption activity. Commitment fees related to the Facility are paid by the participating funds and are included in miscellaneous expenses in the statement of operations. The Portfolio did not utilize the Facility during the year ended December 31, 2009.

NOTE H: Distributions to Shareholders

The tax character of distributions paid during the fiscal years ended December 31, 2009 and December 31, 2008 were as follows:

	2009	2008
Distributions paid from:		
Ordinary income	\$288,603	\$ —
Total taxable distributions	<u>288,603</u>	<u>—</u>
Total distributions paid	<u>\$288,603</u>	<u>—</u>

AllianceBernstein Variable Products Series Fund

As of December 31, 2009, the components of accumulated earnings/(deficit) on a tax basis were as follows:

Undistributed ordinary income	\$ 973,931
Accumulated capital and other losses	(541,989,410)(a)
Unrealized appreciation/(depreciation)	<u>84,685,391(b)</u>
Total accumulated earnings/(deficit)	<u>\$(456,330,088)</u>

(a) On December 31, 2009, the Portfolio had a net capital loss carryforward for federal income tax purposes of \$541,977,622 of which \$293,988,219 expires in the year 2010, \$167,106,343 expires in the year 2011, \$52,077,408 expires in the year 2016, and \$28,805,652 expires in the year 2017. To the extent future capital gains are offset by capital loss carryforwards, such gains will not be distributed. The Portfolio defers \$11,788 in straddle losses.

(b) The difference between book-basis and tax-basis unrealized appreciation/(depreciation) is attributable primarily to the tax deferral of losses on wash sales and the tax treatment of partnerships.

During the current fiscal year, permanent differences primarily due the tax treatment of foreign currency resulted in a net increase in undistributed net investment income, and a net increase in accumulated net realized loss on investments and foreign currency transactions. This reclassification had no effect on net assets.

NOTE I: Legal Proceedings

On October 2, 2003, a purported class action complaint entitled *Hindo, et al. v. AllianceBernstein Growth & Income Fund, et al.* (“Hindo Complaint”) was filed against the Adviser, Alliance Capital Management Holding L.P. (“Alliance Holding”), Alliance Capital Management Corporation, AXA Financial, Inc., the AllianceBernstein Funds, certain officers of the Adviser (“AllianceBernstein defendants”), and certain other unaffiliated defendants, as well as unnamed Doe defendants. The Hindo Complaint was filed in the United States District Court for the Southern District of New York by alleged shareholders of two of the AllianceBernstein Funds. The Hindo Complaint alleges that certain of the AllianceBernstein defendants failed to disclose that they improperly allowed certain hedge funds and other unidentified parties to engage in “late trading” and “market timing” of AllianceBernstein Fund securities, violating Sections 11 and 15 of the Securities Act, Sections 10(b) and 20(a) of the Exchange Act and Sections 206 and 215 of the Advisers Act. Plaintiffs seek an unspecified amount of compensatory damages and rescission of their contracts with the Adviser, including recovery of all fees paid to the Adviser pursuant to such contracts.

Following October 2, 2003, 43 additional lawsuits making factual allegations generally similar to those in the *Hindo* Complaint were filed in various federal and state courts against the Adviser and certain other defendants. On September 29, 2004, plaintiffs filed consolidated amended complaints with respect to four claim types: mutual fund shareholder claims; mutual fund derivative claims; derivative claims brought on behalf of Alliance Holding; and claims brought under ERISA by participants in the Profit Sharing Plan for Employees of the Adviser. All four complaints include substantially identical factual allegations, which appear to be based in large part on the Order of the SEC dated December 18, 2003 as amended and restated January 15, 2004 (“SEC Order”) and the New York State Attorney General Assurance of Discontinuance dated September 1, 2004 (“NYAG Order”).

On April 21, 2006, the Adviser and attorneys for the plaintiffs in the mutual fund shareholder claims, mutual fund derivative claims, and ERISA claims entered into a confidential memorandum of understanding containing their agreement to settle these claims. The agreement will be documented by a stipulation of settlement and will be submitted for court approval at a later date. The settlement amount (\$30 million), which the Adviser previously accrued and disclosed, has been disbursed. The derivative claims brought on behalf of Alliance Holding, in which plaintiffs seek an unspecified amount of damages, remain pending.

It is possible that these matters and/or other developments resulting from these matters could result in increased redemptions of the AllianceBernstein Mutual Funds’ shares or other adverse consequences to the AllianceBernstein Mutual Funds. This may require the AllianceBernstein Mutual Funds to sell investments held by those funds to provide for sufficient liquidity and could also have an adverse effect on the investment performance of the AllianceBernstein Mutual Funds. However, the Adviser believes that these matters are not likely to have a material adverse effect on its ability to perform advisory services relating to the AllianceBernstein Mutual Funds.

NOTE J: Subsequent Events

Management has evaluated subsequent events for possible recognition or disclosure in the financial statements through February 12, 2010, the date the financial statements are issued. Management has determined that there are no material events that would require disclosure in the Portfolio’s financial statements through this date.

<u>Total Return</u>					
Total investment return based on net asset value (b)	37.10%*	(39.82)%*	13.61%*	(.68)%	14.89%
<u>Ratios/Supplemental Data</u>					
Net assets, end of period (000's omitted)	\$233,460	\$192,976	\$393,537	\$456,374	\$624,453
Ratio to average net assets of:					
Expenses	1.13%	1.09%	1.07%	1.08%(c)	1.06%
Net investment income (loss)22%	(.08)%	(.27)%	(.37)%(c)	(.53)%
Portfolio turnover rate	97%	89%	92%	81%	54%

(a) Based on average shares outstanding.

(b) Total investment return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption on the last day of the period. Total return does not reflect (i) insurance company's separate account related expense charges and (ii) the deductions of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares. Total investment return calculated for a period of less than one year is not annualized.

(c) The ratio includes expenses attributable to costs of proxy solicitation.

* Includes the impact of proceeds received and credited to the Portfolio resulting from class action settlements, which enhanced the Portfolio's performance for the years ended December 31, 2009, December 31, 2008 and December 31, 2007 by 1.96%, 2.10% and 0.39%, respectively.

See notes to financial statements.

**REPORT OF INDEPENDENT REGISTERED
PUBLIC ACCOUNTING FIRM**

AllianceBernstein Variable Products Series Fund

**To the Board of Directors of
AllianceBernstein Variable Products Series Fund, Inc.
and Shareholders of AllianceBernstein Large Cap Growth Portfolio:**

We have audited the accompanying statement of assets and liabilities, including the portfolio of investments, of AllianceBernstein Large Cap Growth Portfolio (one of the portfolios constituting the AllianceBernstein Variable Products Series Fund, Inc.) (the "Portfolio") as of December 31, 2009, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Portfolio's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Portfolio's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Portfolio's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2009 by correspondence with the custodian and others, or by other appropriate auditing procedures where replies from others were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of the AllianceBernstein Large Cap Growth Portfolio of the AllianceBernstein Variable Products Series Fund, Inc. at December 31, 2009, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

LARGE CAP GROWTH PORTFOLIO

SENIOR OFFICER FEE EVALUATION

AllianceBernstein Variable Products Series Fund

THE FOLLOWING IS NOT PART OF THE SHAREHOLDER REPORT OR THE FINANCIAL STATEMENTS

SUMMARY OF SENIOR OFFICER'S EVALUATION OF INVESTMENT ADVISORY AGREEMENT¹

The following is a summary of the evaluation of the Investment Advisory Agreement between AllianceBernstein L.P. (the "Adviser") and the AllianceBernstein Variable Products Series Fund (the "Fund"), in respect of AllianceBernstein Large Cap Growth Portfolio (the "Portfolio").² The evaluation of the Investment Advisory Agreement was prepared by Philip L. Kirstein, the Senior Officer of the Fund, for the Directors of the Fund, as required by a September 2004 agreement between the Adviser and the New York State Attorney General (the "NYAG"). The Senior Officer's evaluation of the Investment Advisory Agreement is not meant to diminish the responsibility or authority of the Board of Directors of the Fund to perform its duties pursuant to Section 15 of the Investment Company Act of 1940 (the "40 Act") and applicable state law. The purpose of the summary is to provide shareholders with a synopsis of the independent evaluation of the reasonableness of the advisory fees proposed to be paid by the Portfolio which was provided to the Directors in connection with their review of the proposed approval of the continuance of the Investment Advisory Agreement. The Senior Officer's evaluation considered the following factors:

1. Advisory fees charged to institutional and other clients of the Adviser for like services;
2. Advisory fees charged by other mutual fund companies for like services;
3. Costs to the Adviser and its affiliates of supplying services pursuant to the advisory agreement, excluding any intra-corporate profit;
4. Profit margins of the Adviser and its affiliates from supplying such services;
5. Possible economies of scale as the Portfolio grows larger; and
6. Nature and quality of the Adviser's services including the performance of the Portfolio.

PORTFOLIO ADVISORY FEES, NET ASSETS & EXPENSE RATIOS

The Adviser proposed that the Portfolio pay the advisory fee set forth in the table below for receiving the services to be provided pursuant to the Investment Advisory Agreement. The fee schedule below, implemented in January 2004 in consideration of the Adviser's settlement with the NYAG in December 2003, is based on a master schedule that contemplates eight categories of funds with almost all funds in each category having the same advisory fee schedule.³

Category	Advisory Fee Based on % of Average Daily Net Assets	Net Assets 02/28/09 (\$MIL)	Portfolio
Growth	75 bp on 1st \$2.5 billion 65 bp on next \$2.5 billion 60 bp on the balance	\$321.3	Large Cap Growth Portfolio

The Adviser is reimbursed as specified in the Investment Advisory Agreement for certain clerical, legal, accounting, administrative and other services provided to the Portfolio. During the Portfolio's most recently completed fiscal year, the Adviser received \$93,000 (0.02% of the Portfolio's average daily net assets) for such services.

Set forth below are the Portfolio's total expense ratios for the most recently completed fiscal year:

Portfolio	Total Expense Ratio	Fiscal Year
Large Cap Growth Portfolio	Class A 0.84%	December 31
	Class B 1.09%	

¹ It should be noted that the information in the fee summary was completed on April 23, 2009 and presented to the Board of Directors on May 5-7, 2009.

² Future references to the Fund and the Portfolio do not include "AllianceBernstein." References in the fee summary pertaining to performance and expense ratio rankings refer to the Class A shares of the Portfolio.

³ The AllianceBernstein Mutual Funds, which the Adviser manages, were also affected by the Adviser's settlement with the NYAG.

I. ADVISORY FEES CHARGED TO INSTITUTIONAL AND OTHER CLIENTS

The advisory fees charged to investment companies which the Adviser manages and sponsors are normally higher than those charged to similar sized institutional accounts, including pension plans and sub-advised investment companies. The fee differential reflects, among other things, different services provided to such clients, and different liabilities assumed. Services provided by the Adviser to the Portfolio that are not provided to non-investment company clients and sub-advised investment companies include providing office space and personnel to serve as Fund Officers, who among other responsibilities make the certifications required under the Sarbanes–Oxley Act of 2002, and coordinating with and monitoring the Portfolio’s third party service providers such as Fund counsel, auditors, custodians, transfer agents and pricing services. The accounting, administrative, legal and compliance requirements for the Portfolio are more costly than those for institutional assets due to the greater complexities and time required for investment companies, although as previously noted, a portion of these expenses are reimbursed by the Portfolio to the Adviser. Also, retail mutual funds managed by the Adviser are widely held. Servicing the Portfolio’s investors is more time consuming and labor intensive compared to institutional clients since the Adviser needs to communicate with a more extensive network of financial intermediaries and shareholders. The Adviser also believes that it incurs substantial entrepreneurial risk when offering a new mutual fund since establishing a new mutual fund requires a large upfront investment, and it may take a long time for the fund to achieve profitability since the fund must be priced to scale from inception in order to be competitive and assets are acquired one account at a time. In addition, managing the cash flow of an investment company may be more difficult than managing that of a stable pool of assets, such as an institutional account with little cash movement in either direction, particularly, if a fund is in net redemption and the Adviser is frequently forced to sell securities to raise cash for redemptions. However, managing a fund with positive cash flow may be easier at times than managing a stable pool of assets. Finally, in recent years, investment advisers have been sued by institutional clients and have suffered reputational damage both by the attendant publicity and outcomes other than complete victories. Accordingly, the legal and reputational risks associated with institutional accounts are greater than previously thought, although still not equal to those related to the mutual fund industry.

Notwithstanding the Adviser’s view that managing an investment company is not comparable to managing other institutional accounts because the services provided are different and legal and reputational risks are greater, it is worth considering information regarding the advisory fees charged to institutional accounts with a similar investment style as the Portfolio.⁴ In addition to the AllianceBernstein Institutional fee schedule, set forth below is what would have been the effective advisory fee of the Portfolio had the AllianceBernstein Institutional fee schedule been applicable to the Portfolio versus the Portfolio’s advisory fee based on February 28, 2009 net assets:

Portfolio	Net Assets 02/28/09 (\$MIL)	AllianceBernstein (“AB”) Institutional (“Inst.”) Fee Schedule	Effective AB Inst. Adv. Fee (%)	Effective Portfolio Adv. Fee (%)
Large Cap Growth Portfolio	\$321.3	Large Cap Growth Schedule 80 bp on 1st \$25m 50 bp on next \$25m 40 bp on next \$50m 30 bp on next \$100m 25 bp on the balance <i>Minimum account size \$25m</i>	0.351	0.750

⁴ The Adviser has indicated that with respect to institutional accounts with assets greater than \$300 million, it will negotiate a fee schedule. Discounts that are negotiated vary based upon each client relationship.

LARGE CAP GROWTH PORTFOLIO SENIOR OFFICER FEE EVALUATION

(continued)

AllianceBernstein Variable Products Series Fund

The Adviser also manages AllianceBernstein Large Cap Growth Fund, Inc., a retail mutual fund, which has a substantially similar investment style as the Portfolio. Set forth below is the fee schedule of AllianceBernstein Large Cap Growth Fund, Inc.⁵ Also shown is what would have been the effective advisory fee of the Portfolio had the fee schedule of the Large Cap Growth Fund, Inc. been applicable to the Portfolio:

Portfolio	AllianceBernstein Mutual Fund ("ABMF")	Fee Schedule	Effective ABMF Adv. Fee (%)	Effective Portfolio Adv. Fee (%)
Large Cap Growth Portfolio	Large Cap Growth Fund, Inc.	0.75% on first \$2.5 billion 0.65% on next \$2.5 billion 0.60% on the balance	0.750	0.750

The Adviser also manages and sponsors retail mutual funds, which are organized in jurisdictions outside the United States, generally Luxembourg and Japan, and sold to non-United States resident investors. The Adviser charges the following fees for American Growth Portfolio, which is a Luxembourg fund that has a somewhat similar investment style as the Portfolio. It should be noted that Class A shares of the funds are charged an "all-in" fee, which covers investment advisory services and distribution related services, unlike Class I shares, whose fee is for only investment advisory services.

Fund	Fee
American Growth Portfolio	
Class A	1.50%
Class I (Institutional)	0.70%

The AllianceBernstein Investment Trust Management mutual funds ("ITM"), which are offered to investors in Japan, have an "all-in" fee to compensate the Adviser for investment advisory as well as fund accounting and administrative related services. The fee schedule of the ITM mutual fund that has a somewhat similar investment style as the Portfolio is as follows:

Portfolio	ITM Mutual Fund	Fee
Large Cap Growth Fund, Inc.	AllianceBernstein U.S. Large Cap Growth Equity—Hedged/Non-Hedged	0.95%

The Adviser provides sub-advisory services to certain other investment companies managed by other fund families that have an investment style similar to that of the Portfolio. The Adviser charges the fees set forth below for each of these sub-advisory relationships. Also shown are what would have been the effective advisory fees of the Funds had the fee schedules of the sub-advisory relationships been applicable to those Funds based on February 28, 2009 net assets and the Funds' advisory fees:

Portfolio	Fee Schedule	Effective Sub-Adv. Fee (%)	Portfolio Advisory Fee (%)	
Large Cap Growth Portfolio	Client #1	0.35% on 1st \$50 million 0.30% on next \$100 million 0.25% on the balance	0.281	0.750
	Client #2	0.40% on first \$200 million 0.35% on next \$300 million 0.25% on the balance	0.272	0.750
	Client #3	0.60% on 1st billion 0.55% on the balance	0.600	0.750
	Client #4	0.35%	0.350	0.750

⁵ It should be noted that the AllianceBernstein Mutual Fund was also affected by the settlement between the Adviser and the NYAG. As a result, the Portfolio has the same breakpoints in its advisory fee schedule as the AllianceBernstein Mutual Fund.

It is fair to note that the services the Adviser provides pursuant to sub-advisory agreements are generally confined to the services related to the investment process; in other words, they are not as comprehensive as the services provided to the Portfolios by the Adviser. In addition, to the extent that certain of these sub-advisory relationships are with affiliates of the Adviser, the fee schedules may not reflect arm’s-length bargaining or negotiations.

II. MANAGEMENT FEES CHARGED BY OTHER MUTUAL FUND COMPANIES FOR LIKE SERVICES.

Lipper, Inc. (“Lipper”), an analytical service that is not affiliated with the Adviser, compared the fees charged to the Portfolio with fees charged to other investment companies for similar services offered by other investment advisers. Lipper’s analysis included the Portfolio’s ranking with respect to the proposed management fee relative to the median of the Portfolio’s Lipper Expense Group (“EG”)⁶ at the approximate current asset level of the Portfolio.⁷

Lipper describes an EG as a representative sample of comparable funds. Lipper’s standard methodology for screening funds to be included in an EG entails the consideration of several fund criteria, including fund type, investment classification/objective, load type and similar 12b-1/non-12b-1 service fees, asset (size) comparability, expense components and attributes. An EG will typically consist of seven to twenty funds.

Portfolio	Contractual Management Fees ⁸	Lipper Exp. Group Median (%)	Rank
Large Cap Growth Portfolio	0.750	0.738	9/15

Lipper also analyzed the Portfolio’s most recently completed fiscal year total expense ratio in comparison to the Portfolio’s EG and Lipper Expense Universe (“EU”). The EU⁹ is a broader group compared to the EG, consisting of all funds that have the same investment classification/objective and load type as the subject Portfolio.

It should be noted that Lipper uses expense ratio data from financial statements of the most current fiscal year in their database. This has several implications: the total expense ratio of each fund that Lipper uses in their report is based on each fund’s average net assets during its fiscal year. Since funds have different fiscal year ends, the total expense ratios of the funds may cover different twelve month periods, depending on the funds’ fiscal year ends. This is the process that Lipper utilizes but given bear market conditions during 2008, especially the last three months of 2008, the effects on the funds’ total expense ratio caused by the differences in fiscal year ends may be more pronounced in 2008 compared to other years under more normal market conditions.¹⁰

Portfolio	Expense Ratio (%) ¹¹	Lipper Exp. Group Median (%)	Lipper Group Rank	Lipper Exp. Universe Median (%)	Lipper Universe Rank
Large Cap Growth Portfolio	0.841	0.775	12/15	0.815	54/84

Based on this analysis, the Portfolio has a more favorable ranking on a management fee basis than it does on a total expense ratio basis.

⁶ It should be noted that Lipper does not consider average account size when constructing EGs. Funds with relatively small average account sizes tend to have higher transfer agent expense ratios than comparable sized funds that have relatively large average account sizes. Note that there are limitations on Lipper expense category data because different funds categorize expenses differently.

⁷ The contractual management fee is calculated by Lipper using the Portfolio’s contractual management fee rate at a hypothetical asset level. The hypothetical asset level is based on the combined net assets of all classes of the Portfolio, rounded up to the next \$25 million. Lipper’s total expense ratio information is based on the most recent annual report except as otherwise noted. A ranking of “1” would mean that the Portfolio had the lowest effective fee rate in the Lipper peer group.

⁸ The contractual management fee does not reflect any expense reimbursements made by the Portfolio to the Adviser for certain clerical, legal, accounting, administrative and other services.

⁹ Except for asset (size) comparability, Lipper uses the same criteria for selecting an EG when selecting an EU. Unlike the EG, the EU allows for the same adviser to be represented by more than just one fund.

¹⁰ To cite an example, the average net assets and total expense ratio of a fund with a fiscal year end of March 31, 2008 will not be reflective of the market declines that occurred in the second half of 2008, in contrast to a fund with a fiscal year end of December 31, 2008.

¹¹ Most recently completed fiscal year end Class A total expense ratio.

LARGE CAP GROWTH PORTFOLIO

SENIOR OFFICER FEE EVALUATION

(continued)

AllianceBernstein Variable Products Series Fund

III. COSTS TO THE ADVISER AND ITS AFFILIATES OF SUPPLYING SERVICES PURSUANT TO THE ADVISORY FEE ARRANGEMENT, EXCLUDING ANY INTRA-CORPORATE PROFIT.

The Adviser utilizes two profitability reporting systems, which operate independently but are aligned with each other, to estimate the Adviser's profitability in connection with investment advisory services provided to the Portfolio. The Senior Officer has retained a consultant to provide independent advice regarding the alignment of the two profitability systems as well as the methodologies and allocations utilized by both profitability systems. See Section IV for additional discussion.

IV. PROFIT MARGINS OF THE ADVISER AND ITS AFFILIATES FOR SUPPLYING SUCH SERVICES.

The Portfolio's profitability information, prepared by the Adviser for the Board of Directors, was reviewed by the Senior Officer and the consultant. The Adviser's profitability from providing investment advisory services to the Portfolio decreased during calendar year 2008, relative to 2007.

In addition to the Adviser's direct profits from managing the Portfolio, certain of the Adviser's affiliates have business relationships with the Portfolio and may earn a profit from providing other services to the Portfolio. The courts have referred to this type of business opportunity as "fall-out benefits" to the Adviser and indicated that such benefits should be factored into the evaluation of the total relationship between the Portfolio and the Adviser. Neither case law nor common business practice precludes the Adviser's affiliates from earning a reasonable profit on this type of relationship provided the affiliates' charges and services are competitive. These affiliates provide transfer agent, distribution and brokerage related services to the Portfolio and receive transfer agent fees, Rule 12b-1 payments and brokerage commissions. In addition, the Adviser benefits from soft dollar arrangements which offset expenses the Adviser would otherwise incur.

The Portfolio has adopted a distribution plan for Class B shares pursuant to Rule 12b-1 under the 40 Act. Under the distribution plan, the Portfolio pays distribution and servicing fees to its principal underwriter, AllianceBernstein Investments, Inc. ("ABI"), at an annual rate of up to 0.50% of the Portfolio's average daily net assets attributable to Class B shares. The current annual rate that the Portfolio pays to ABI for 12b-1 fees is 0.25%. During the fiscal year ended December 31, 2008, AllianceBernstein Investments, Inc. ("ABI"), the Portfolio's distributor and an affiliate of the Adviser, received \$730,025 in Rule 12b-1 fees.

The Adviser may compensate ABI for payments made by ABI to brokers for registration fees and services related to printing, distribution and advertising in connection with Class B shares. During the fiscal year ended December 31, 2008, the Adviser determined that it made payments in the amount of \$283,546 on behalf of the Portfolio to ABI.

Financial intermediaries, such as insurers, market and sell shares of the Portfolio and typically receive compensation from ABI, the Advisers and/or the Portfolio for selling shares of the Portfolio. These financial intermediaries receive compensation in any or all of the following forms: 12b-1 fees, defrayal of costs for educational seminars and training, additional distribution support, recordkeeping and/or administrative services. Payments related to providing contract-holder recordkeeping and/or administrative services will generally not exceed 0.35% of the average daily net assets of the Portfolio attributable to the relevant intermediary over the year.

The transfer agent of the Portfolio is AllianceBernstein Investor Services, Inc. ("ABIS"). During the most recently completed fiscal year, ABIS received a fee of \$969 from the Portfolio.¹²

The Portfolio may effect brokerage transactions through the Adviser's affiliate, Sanford C. Bernstein & Co., LLC ("SCB & Co.") and/or its U.K. affiliate, Sanford C. Bernstein Limited ("SCB Ltd."), collectively "SCB," and pay commissions for such transactions during the Portfolio's most recently completed fiscal year. During the Portfolio's most recently completed fiscal year, the Portfolio did not effect any brokerage transactions with and pay any commission to SCB. The Adviser represented that SCB's profitability from business conducted with the Portfolio is comparable to the profitability of SCB's dealings with other similar third party clients. In the ordinary course of business, SCB receives and pays liquidity rebates from electronic communications networks ("ECNs") derived from trading for its clients, including the Portfolio. These credits and charges are not being passed onto any SCB client. The Adviser also receives certain soft dollar benefits from brokers that execute agency trades for the Portfolio and other clients. These soft dollar benefits reduce the Adviser's cost of doing business and increase its profitability.

¹² The Fund (which includes the Portfolio and other Portfolios of the Fund) paid ABIS a flat fee of \$18,000 in 2008.

V. POSSIBLE ECONOMIES OF SCALE

The Adviser has indicated that economies of scale are being shared with shareholders through fee structures,¹³ subsidies and enhancement to services. Based on some of the professional literature that has considered economies of scale in the mutual fund industry, it is thought that to the extent economies of scale exist, they may more often exist across a fund family as opposed to a specific fund. This is because the costs incurred by the Adviser, such as investment research or technology for trading or compliance systems can be spread across a greater asset base as the fund family increases in size. It is also possible that as the level of services required to operate a successful investment company has increased over time, and advisory firms make such investments in their business to provide services, there may be a sharing of economies of scale without a reduction in advisory fees.

An independent consultant, retained by the Senior Officer, provided the Board of Directors an update of the Deli¹⁴ study on advisory fees and various fund characteristics. The independent consultant first reiterated the results of his previous two dimensional comparison analysis (fund size and family size) with the Board of Directors.¹⁵ The independent consultant then discussed the results of the regression model that was utilized to study the effects of various factors on advisory fees. The regression model output indicated that the bulk of the variation in fees predicted were explained by various factors, but substantially by fund AUM, family AUM, index fund indicator and investment style. The independent consultant also compared the advisory fees of the AllianceBernstein Mutual Funds to similar funds managed by 19 other large asset managers, regardless of the fund size and each Adviser’s proportion of mutual fund assets to non-mutual fund assets.

VI. NATURE AND QUALITY OF THE ADVISER’S SERVICES, INCLUDING THE PERFORMANCE OF THE PORTFOLIO

With assets under management of approximately \$411 billion as of March 31, 2009, the Adviser has the investment experience to manage and provide non-investment services (described in Section I) to the Portfolio.

The information prepared by Lipper shows the 1, 3, 5 and 10 year performance rankings of the Portfolio¹⁶ relative to its Lipper Performance Group (“PG”) and Lipper Performance Universe (“PU”)¹⁷ for the periods ended January 31, 2009.¹⁸

	Portfolio Return	PG Median (%)	PU Median (%)	PG Rank	PU Rank
1 year	– 35.23	– 37.10	– 37.68	5/15	19/102
3 year	– 14.33	– 13.72	– 12.60	11/15	71/93
5 year	– 4.35	– 5.43	– 4.97	4/13	33/82
10 year	– 5.27	– 4.05	– 3.56	7/11	38/48

13 Fee structures include fee reductions, pricing at scale and breakpoints in advisory fee schedules.

14 The Deli study was originally published in 2002 based on 1997 data.

15 The two dimensional analysis showed patterns of lower advisory fees for funds with larger asset sizes and funds from larger family sizes compared to funds with smaller asset sizes and funds from smaller family sizes, which according to the independent consultant is indicative of a sharing of economies of scale and scope. However, in less liquid and active markets, such is not the case, as the empirical analysis showed potential for diseconomies of scale in those markets. The empirical analysis also showed diminishing economies of scale and scope as funds surpassed a certain high level of assets.

16 The performance rankings are for the Class A shares of the Portfolio. It should be noted that the performance returns of the Portfolio shown were provided by the Adviser. Lipper maintains its own database that includes the Portfolio’s performance returns. Rounding differences may cause the Adviser’s Portfolio returns to be one or two basis points different from Lipper’s own Portfolio returns. To maintain consistency, the performance returns of the Portfolio, as reported by the Adviser, are provided instead of Lipper.

17 The Portfolio’s PG is identical to the Portfolio’s EG. The Portfolio’s PU is not identical to the Portfolio’s EU as the criteria for including in or excluding a fund from a PU is somewhat different from that of an EU.

18 Note that the current Lipper investment classification/objective dictates the PG and PU throughout the life of the fund even if a fund had a different investment classification/objective at a different point in time.

LARGE CAP GROWTH PORTFOLIO
SENIOR OFFICER FEE EVALUATION

(continued)

AllianceBernstein Variable Products Series Fund

Set forth below are the 1, 3, 5, 10 year and since inception performance returns of the Portfolio (in bold)¹⁹ versus its benchmark.²⁰ Portfolio and benchmark volatility and reward-to-variability ratio (“Sharpe Ratio”) information is also shown.²¹

	Periods Ending January 31, 2009						Annualized Performance		Risk Period (Year)
	1 Year (%)	3 Year (%)	5 Year (%)	10 Year (%)	Since Inception (%)	Volatility (%)	Sharpe (%)		
Large Cap Growth Portfolio	-35.23	-14.33	-4.35	-5.27	6.41	18.49	-0.38	10	
Russell 1000 Growth Index	-36.44	-11.11	-4.76	-5.29	4.99	18.75	-0.37	10	

Inception Date: June 26, 1992

CONCLUSION:

Based on the factors discussed above the Senior Officer’s conclusion is that the proposed advisory fee for the Portfolio is reasonable and within the range of what would have been negotiated at arm’s-length in light of all the surrounding circumstances. This conclusion in respect of the Portfolio is based on an evaluation of all of these factors and no single factor was dispositive.

Dated: June 1, 2009

¹⁹ The performance returns and risk measures shown in the table are for the Class A shares of the Portfolio.

²⁰ The Adviser provided Portfolio and benchmark performance return information for periods through January 31, 2009.

²¹ Portfolio and benchmark volatility and Sharpe Ratio information was obtained through Lipper LANA, a database maintained by Lipper. Volatility is a statistical measure of the tendency of a market price or yield to vary over time. A Sharpe Ratio is a risk adjusted measure of return that divides a portfolio’s return in excess of the riskless return by the portfolio’s standard deviation. A portfolio with a greater volatility would be seen as more risky than a portfolio with equivalent performance but lower volatility; for that reason, a greater return would be demanded for the more risky portfolio. A portfolio with a higher Sharpe Ratio would be viewed as better performing than a portfolio with a lower Sharpe Ratio.
